ABOUT ME

Front-end developer with proven experience at Hipolabs and Pera Wallet in creating large, complex web applications with scalable and reusable codebases powered by blockchain technology. Experience in driving projects forward and maintaining them while working together with designers, back-end developers and QA engineers. Capable of continuous learning from senior developers while still nurturing junior developers. Passionate about learning and development with a desire to apply skills on a large development team. Eager to tackle more complex problems and continue improve skills on software architecture and UI development.

WORK EXPERIENCE

Front-End Developer

Hipolabs - hipolabs.com

Sep 2021 - May 2023

- **Algorand Governance Platform:** Built new features and provided maintenance on a platform in which users can vote on the future of Algorand ecosystem each period via wallet transactions - governance.algorand.foundation
- **Blackbook & Australia Zoo NFTs:** Built 2 separate NFT marketplace apps that worked on the same codebase, requiring complex architecture to create two separate themes. The project generated \$250.000+ in total income.
- **Unwrapit:** Built new features and provided maintenance on a personalized digital gifting platform - unwrapit.com
- **Tinyman:** Provided tests and code reviews on the biggest decentralized trading protocol on Algorand blockchain - tinyman.org
- Built, reviewed and provided maintenance on a custom reusable React component library. npmjs.com/package/@hipo/react-ui-toolkit
- Provided valuable mentorship and guidance to interns, offering support in their professional development and fostering a conducive learning environment.

Front-End Developer

Pera Wallet - perawallet.app

Oct 2022 - May 2023

- Developed the Discover feature for the 'Pera Wallet' application, a web app injected as a WebView within the Android and iOS platforms.
- Discover serves as a comprehensive section within the app, offering users access to information on Algorand tokens, NFTs, and other decentralized applications (dApps)."
- Additionally, implemented a browser section within Discover, enabling users to seamlessly browse through various dApps.
- Overcame the challenge of establishing communication between the web app and the mobile apps to ensure smooth functionality.
